

BACHELOR OF SCIENCE DEGREE

SPECIALIZED STUDIES

A freshman must have an active associate degree program in addition to the Specialized Studies baccalaureate program. The associate degree will satisfy the lower-level requirements for the Specialized Studies program. When the associate degree program is completed or nearly completed, courses at the upper level can be started. It is required that students who declare this program a) complete the associate degree program and b) also have the intent to complete the baccalaureate degree program.

A student transferring into the program with a completed associate degree from the University of Northwestern Ohio or another regionally accredited college or university will use that concentration for the lower-level requirements and will be admitted to Option 1 which has requirements for the Specialized Studies in Business Administration. By submitting documentation to the Registrar's Office and with the approval of the Vice President for Academic Affairs, students with extensive healthcare related work experience may be admitted to Option 2 which has requirements majoring in Healthcare Administration. Students will complete 90 credit hours at the upper level to meet the requirements for this program.

Students with a completed associate degree in Business Administration should declare the baccalaureate degree in Business Administration. Students with a completed associate degree in an allied health area that meets the requirements for the baccalaureate degree in Healthcare Administration should declare that program. Associate degrees in other majors from accredited institutions make students eligible for the baccalaureate degree in Specialized Studies.

MISSION STATEMENT:

To meet the individual needs of students, the University has developed a degree program that allows them to design majors that cross disciplines.

Junior- and Senior-Level Courses: 90 Credit Hours

Students will choose one of the upper level options to complete the degree.

OPTION 1 (Please see next page for Option 2.)

Technical and Basic Requirements:

46 Credit Hours
